Summary

I am an SpR at Bogfields with my CCST due this July. In this role I have gained a comprehensive training in all areas of ophthalmology.

I studied medicine and did house jobs in Easthampton, then started my ophthalmology as an SHO in St Guy's. I've completed registrar training with a fellowship in syringing & probing.

My personal background & post-graduate training have put me in the perfect position to fulfill this position in Bigtown. I love the area, having family from here. My particular interests will not only complement the current work of this department, but will significantly expand the sub specialty services available in this dynamic department.

Surgical Experience

Cataract	1000 (>950 phaco)
Probings	500 (499 with the MegaLaser™)

Publications & Presentations

Peer reviewed publications	13
Invited lectures	3 at international meetings 6 at national meetings 35 at regional meetings

Audit

Subject	Year	Outcome
Syringing	1991	Reduced inappropriate GA on children by 50%
Probing	1993	Increased No of children needing syringing by 50%

Management Experience

	Year	What experience did I gain?
Elected regional trainee rep	1992	Learnt committee protocols
Deanery regional management training course	1992 to date	Learnt how to avoid doing long clinics

Married with 2 children to an NHS manager who comes from Bigtown, we know the area well having spent many happy holidays visiting relatives & friends and would love the chance to settle here.

Interests include tiddlywinks, doing triathlons and flower arranging.

I am available to take up the position within 3 months of interview.

Publications

Book Chapters

Postoperative Care After Probing.

F Bloggs, D Elder.

In: Eye Transplantation Surgery. Edit: D Elder.

Pub: H Potter Medical Publishers Ltd, Baghdad 2003:95-182.

Scientific Journals

Expressed fibroblasts in Syringing fluid express inactive Epidermal Growth Factor receptors.

D Doyne, **F Bloggs**, E Nettleship

Eye. 2003;74:237-44
